EXPERIENCE

MP Consulting, LLC.

Aug 2023 – present

Full Stack Developer

Ahmedabad, Gujarat

- Designed and maintained web applications using **Next.js** and **Chakra UI** for responsive and dynamic frontend experiences.
- Developed and optimized backend services using **Node.js** and **MySQL**, ensuring efficient database operations and API integrations.
- Engineered deployment strategies leveraging **AWS EC2**, **Amplify**, **RDS**, and **S3**, enabling reliable and scalable application hosting.
- Managed the **entire product development lifecycle**, including requirement gathering, database schema design, UI implementation, API development, and client-side integration.
- Built robust functionality to read, update, and insert data from **Google Sheets**, ensuring over 10,000 records were processed without duplication.
- Designed a **role-based and module-based access control system** to enhance application security and user management.
- Generated dynamic, customized **PDFs** for invoices and reports using **EJS** in Node.js.
- Delivered a **comprehensive time-tracking module**, providing insights into team activities with detailed visual and graphical reports segmented by teams and departments.
- Independently managed end-to-end development lifecycles, ensuring timely delivery and high-quality outputs.
- Conducted extensive testing and authored detailed test cases to validate features and maintain application stability.

CultureX Entertainment Pvt. Ltd.

Jan 2022 – July 2023

Full Stack Developer

Ahmedabad, Gujarat

- Developed a platform to connect brands with **influencers** for sponsored content, enabling seamless collaboration and streamlined processes.
- Collaborated with the marketing team and **UX/UI team** to ensure the platform met business requirements, was user-friendly, and had a visually appealing interface.
- Designed and implemented the frontend using **React.js**, delivering a responsive and intuitive user experience.
- Developed and maintained the backend using **Node.js** and **MySQL**, ensuring efficient data handling and reliable system performance.
- Integrated **invoice processing** functionality, automating billing workflows for transparency and efficiency.

PROJECTS

NPM package 🔗 | [SVGR](#), [Rollup](#), [Babel](#)

- Developed a comprehensive icon package featuring a variety of vector-based icons that can be seamlessly integrated into React projects.
- Ensured **simple and intuitive syntax** for easy integration, improving developer productivity and project scalability.
- Designed all icons to be vector-based, enabling resizing and customization without compromising quality or resolution, ensuring adaptability for various use cases and screen sizes.

Blog Module 🔗 | [Next.js](#), [Firebase](#)

- Designed and developed a **dynamic blog web application** using **Next.js** for a modern, server-rendered frontend and **Firebase** for real-time backend capabilities.
- Implemented core features including **creating, editing, and sharing blog posts**, ensuring a seamless user experience for content management.
- Deployed the application on the cloud with a **custom domain**, delivering reliable performance and accessibility.
